

Programming Assignment 2: Linked List

[Screenshot of Runtime Output of Code]

The screenshot shows the Visual Studio Code interface with the 'TERMINAL' panel active. The terminal displays the output of a C++ program that implements a linked list. The program processes four input series, each with a set of numbers to be added and a set of numbers to be removed. The output shows the state of the linked list after each operation, including when it becomes empty.

```
C:\Users\rmot\Desktop\COMP260\Assignment 2> cmd /C "C:\Users\rmot\vscode\extensions\ms-vscode.cpptools-1.19.7-win32-x64\debugadapters\bin\windowDebugLauncher.exe --stdin=Microsoft-Engine-In-gacry5yf.aw  
C:\Users\rmot\Desktop\COMP260\Assignment 2> cd C:\Users\rmot\Desktop\COMP260\Assignment 2  
C:\Users\rmot\Desktop\COMP260\Assignment 2> g++ driver.cpp -std=c++11 -g -o driver.exe  
C:\Users\rmot\Desktop\COMP260\Assignment 2> .\driver.exe  
Input series 1: (1,3,2,4,5,6,9)  
8 6 4 2 1 3 9  
removal series 1a: (2 evens, 1 odd)  
4 2 1 3  
removal series 1b: (3 odds, 3 evens)  
No odd numbers!  
List is empty!  
  
Input series 2: (0,1,2,3,4,5,6,7)  
6 4 2 0 1 3 5  
removal series 2a: (3 odds, 3 evens)  
0  
removal series 2b: (3 evens, 3 odds)  
List is empty!  
List is empty!  
List is empty!  
List is empty!  
List is empty!  
  
Input series 3: (4,3,2,1,0,-1,-2,-3)  
-2 0 2 4 3 1 -1 -3  
removal series 3: (clear function)  
Cleared stage!  
  
Input series 4: (2,2,2,2,2)  
2 2 2 2 2  
removal series 4a: (1 odd, 3 evens)  
No odd numbers!  
2 2  
removal series 4b: (3 evens)  
List is empty!
```

DISCUSSION

Comments:

My program is functioning as it is designed to do in accordance with the problem description, the driver program tests 4 input and removal series, and displays the results.

Corner Cases:

I have tested my functions and overloaded operators to work with my Staque class. Here is a list of things that I didn't test however:

- Extremely *large* values list lengths
- Non-integer insertions

The function properly prepends and appends even and odd values to the staque, I have also tested negative values, attempting to delete odd or even when no such values exist in the staque, and chaining most member and non-member functions together.
